OPA13

One Piece TPU Apron

- No straps, buckles or ties to come loose
- Five colours for zone and allergen control
- Reusable and wipes clean in seconds
- Certified for direct food contact

OPA13B

Product Features & Benefits

No loose items

No straps, buckles or ties in the construction, so there is nothing to fray, snag on moving equipment, or work its way somewhere it should not be.

Easy cleaning

A smooth, non-porous TPU surface wipes and rinses clean, with no seams or fastenings for residue to collect in.

Extremely flexible

TPU holds its softness through repeated washdown and cold-room use, rather than stiffening, cracking or splitting the way coated fabrics do.

Waterproof

Stands up to meat, fat and blood and resists weak acids and alkalis.

Five colours for zone control

Blue, green, red, white and yellow support colour-coded zoning and allergen segregation across your site.
